

Benefits of membership

By joining the Society you will be able to:

- Participate in the activities of the country's foremost lighting body including monthly meetings in London from September to May
- Keep up-to-date with developments in lighting design and technology, and with the innumerable other applications of light and lighting
- If you have suitable qualifications and experience in light and lighting, gain the right to use the designatory letters MSLL (Member) or FSLL (Fellow)
- Receive the Society's Newsletter six times a year as well as receiving *The Lighting Journal* and the monthly official CIBSE journal, *Building Services Journal*
- Purchase all the publications of the Society of Light and Lighting and CIBSE publications (including those produced in electronic format) at substantial discounted prices
- Receive the world renowned quarterly research journal *Lighting Research & Technology* at a special members' subscription rate
- Take part in forming policy on technical and design matters important to lighting
- Come to Society conferences and other events at concessionary rates
- Attend meetings on lighting and other topics organised by the CIBSE Regions
- Receive occasional free Factfiles on matters of topical interest ranging from the Building Regulations to car park lighting
- Take part in activities of the Chartered Institution of Building Services Engineers at reduced member rates.

Lighting education

The Society has played a major part in the development of the distance learning package run by the Lighting Education Trust and South Bank University. It also recognises and promotes the courses run for the Lighting Industry Federation, and the MSc in Light and Lighting run by the Bartlett School of Graduate Studies, as well as lighting courses run by other academic institutions.

Classes of membership

- The Society offers a range of classes of membership related to members' qualifications and experience in light and lighting, regardless of whether members are engineers or not.
- There is also a scheme for companies.

Daylight

The Society has close links with the CIBSE Daylight Group which organises regular events around the country.

Professional advice

The Society publishes a Lighting Register which is made available to those seeking independent professional advice on lighting matters. To be included in the Register, a practice must employ at least one holder of the Lighting Diploma. The Register is revised annually and can be accessed on the Society website www.sll.org.uk

The Society of Light and Lighting

The Society of Light and Lighting is the senior professional body in the UK representing the interests of those involved in the art, science and engineering of light and lighting in their widest definition. It offers authoritative publications, professional recognition and a wide range of learned society activities.

Although it was launched only in 1999, the Society builds on nearly 100 years of history. Its origins go back to the formation in 1909 of the Illuminating Engineering Society which had the aim of considering all applications of natural and artificial light.

The Society has been formed as part of the Chartered Institution of Building Services Engineers to offer the best of both worlds: the strength of a chartered professional institution with the freedom to serve the world of light and lighting without being restricted to engineering aspects.

It is thus able to welcome all those who contribute to the world of light and lighting: lighting designers, lamp and luminaire manufacturers, sales people, consultants, installers, facilities managers, ergonomists, interior designers, ophthalmologists, architects, physicists, entertainment lighting specialists; in fact anyone who has an interest in any aspect of light and lighting.

The aims of the Society are:

- To promote the benefits of good lighting
- To provide professional recognition of those who have qualifications and/or experience in light and lighting
- To establish and promote good practice in lighting design and engineering in all their facets
- To provide a forum where people interested in all aspects of light and lighting can come together
- To set and maintain standards in education for light and lighting
- To advise government and other authoritative bodies on the best use and application of light and lighting.

Published advice on good lighting

For many years the IES, the CIBSE Lighting Division and now the Society of Light and Lighting have provided the authoritative guidance documents used by those involved in lighting in the UK, including regular revisions of the *Code for Interior Lighting* (now known as the *Code for Lighting*). This is now available in printed form or as a CD-ROM.

The Society also has a wide range of *Lighting Guides* providing practical information on aspects of lighting ranging from subjects of general importance such as office lighting to more specialist documents such as that on specification and measurement of surface reflectance and colour. The *Code for Lighting* and *Lighting Guides* are regularly revised and updated, and new titles issued.
